Articles

Cadmium-induced apoptosis and changes in expression of *p53*, c-*jun* and *MT-I* genes in testes and ventral prostate of rats
T. Zhou, G. Zhou, W. Song, N. Eguchi, W. Lu, E. Lundin, T. Jin, G. Nordberg (Sweden, People's Republic of China) 1–13
Cadmium is able to modify gene expression

Effect of central and peripheral cholinergic antagonists on chlorpyrifos-induced changes in body temperature in the rat
C.J. Gordon, T.A. Grantham (USA) 15–28
A rational therapeutic approach for treatment of fever after organophophate exposure is offered

Carcinogenicity testing in the CD-1 mouse of a prospective insect repellant (KBR 3023) using the dermal route of exposure
B.S. Wahle, G.K. Sangha, L.E. Elcock, L.P. Sheets, W.R. Christenson (USA) 29–39
No evidence for treatment-related carcinogenic effects was found

Chronic toxicity and carcinogenicity testing in the Sprague–Dawley rat of a prospective insect repellant (KBR 3023) using the dermal route of exposure
B.S. Wahle, G.K. Sangha, S.G. Lake, L.P. Sheets, C. Croutch, W.R. Christenson (USA) 41–56
No evidence for treatment-related carcinogenic effects was found

Effects of the chlorotriazine herbicide, cyanazine, on $GABA_A$ receptors in cortical tissue from rat brain
T.J. Shafer, T.R. Ward, C.A. Meacham, R.L. Cooper (USA) 57–68
Chlorotriazines alter receptor functions

The susceptibility to nephrotoxicity of streptozotocin-induced diabetic rats subchronically exposed to cadmium chloride in drinking water
T. Jin, G. Nordberg, J. Sehlin, H. Wallin, S. Sandberg (Sweden) 69–75
Diabetic rats are more susceptible to kidney damage

Possible involvement of beta-adrenergic receptors in the enhancement of nocturnal pineal *N*-acetyltransferase activity due to parathion administration
Propranolol blocks parathion-induced increase of NAT
A.M. Attia (Egypt) 79–86

Hepatotoxicity of tetrabromobisphenol-A: effects of repeated dosage in rats
Several biochemical parameters are influenced in a complex manner
J.A. Szymańska, J.K. Piotrowski, B. Frydrych (Poland) 87–95

Effect of dietary aluminum on tissue nonheme iron and ferritin levels in the chick
Aluminium interrupts normal iron absorption and disrupts regulation of tissue ferritin levels
J. Han, J. Han, M.A. Dunn (USA) 97–109

Chromium increases pancreatic metallothionein in the rat
Pancreas may be a target organ for chromium toxicity
M.J. Solis-Heredia, B. Quintanilla-Vega, A. Sierra-Santoyo, J.M. Hernández, E. Brambila, M.E. Cebrián, A. Albores (Mexico) 111–117

The effect of vitamin E exposure on cadmium toxicity in mouse embryo cells in vitro
Some protection was found
S. Warren, S. Patel, C.M. Kapron (Canada) 119–126

Differential sensitivities of MRP1-overexpressing lung tumor cells to cytotoxic metals
A multidrug resistance protein removes also certain metals from cultured cells thereby conferring increased resistance
L. Vernhet, N. Allain, C. Bardiau, J.-P. Anger, O. Fardel (France) 127–134
Early hepatic changes in rats induced by permethrin in comparison with DDT
The effects on mitogenesis after in vivo application are described
G. Kostka, D. Palut, J. Kopeć-Szlęzak, J.K. Ludwicki (Poland) 135–143
Flow cytometry as a tool to monitor the disturbance of phagocytosis in the clam *Mya arenaria* hemocytes following in vitro exposure to heavy metals.
Flow cytometry is a useful tool to evidence the effect of heavy metals on clams
P. Brousseau, J. Pellerin, Y. Morin, D. Cyr, B. Blakley, H. Boermans, M. Fournier (Canada) 145–156

Special Issue

7th SUMMER SCHOOL IN IMMUNOLOGY

Arles, France 14–16 September 1999

Editorial

Integrating immunotoxicity with effects on other biological systems in preclinical safety evaluation: a perspective
J. Descotes (France). 157–160

Articles

Endocrine and neurological adverse effects of the therapeutic interferons
T. Vial, G. Choquet-Kastylevsky, C. Liautard, J. Descotes (France). 161–172
Hepatic drug metabolism and immunostimulation
K.W. Renton (Canada). 173–178
Past, present and future of psychoneuroimmunology
K. Mašek, P. Petrovický, J. Ševčík, Z. Zídek, D. Franková (Czech Republic) 179–188
Central/peripheral nervous system and immune responses
D.A. Lawrence, D. Kim (USA) 189–201
Epidermal cytokines in experimental contact dermatitis
E. Corsini, C.L. Galli (Italy). 203–211
Approaches to the identification and recording of findings in the lymphoreticular organs indicative for immunotoxicity in regulatory type toxicity studies
J.H. Harleman (Germany) 213–219
